Experience

AI Intern - Movya Infotech

06/2025 – 11/2025

Ahmedabad

- Worked as an AI Engineer Intern, developing and implementing machine learning solutions using Python.
- Built and trained machine learning models using Scikit-learn for practical applications.
- Performed data preprocessing, data cleaning, and feature engineering to improve model performance.
- Implemented Natural Language Processing techniques, including TF-IDF, text classification, and sentiment analysis.
- Developed scalable RESTful APIs using FastAPI to integrate and deploy machine learning models.
- Worked with n8n to develop AI-powered automation workflows and streamline business processes.
- Gained hands-on experience in machine learning, NLP, backend API development, and AI automation.

Skills

Programming Languages

Python (Numpy, Pandas, Matplotlib, seaborn, Scikit-learn)

Web Development & Frameworks

FastAPI, Streamlit

Database

PostgreSQL, SQL, Supabase

Tools & IDEs

n8n, make.com, VS Code, PyCharm, GitHub, Jupyter Notebook

AI/ML

Machine Learning, Deep Learning, Natural Language Processing (NLP), TensorFlow, PyTorch

Soft Skills

Flexible with Work, Communication, Adaptability, Quick learner, Problem-Solving, Teamwork

Projects

Real-Time Face Mask Detection System

- Developed a real-time face mask detection system using CNN (MobileNetV2) for accurate mask classification.
- Integrated YOLO and OpenCV for fast and reliable face detection in images, videos, and live webcam streams.
- Built a complete deep learning pipeline including data preprocessing, model training, validation, and real-time inference.
- Achieved high accuracy with stable loss through optimized training and dataset preprocessing techniques.
- Implemented bounding box visualization with class labels and confidence scores for real-time monitoring.
- Designed a user-friendly Tkinter GUI for interactive system deployment.
- Demonstrated practical application of computer vision for automated public health compliance monitoring.

AI Blog Posting Agent

- Developed an automated pipeline with n8n to research topics, generate SEO-friendly blog drafts, create images, and publish content on WordPress.
- Integrated Google Sheets, Tavily, NewsAPI, and AI models to dynamically fetch, enrich, and format content.
- Automated blog cover image generation and metadata processing to ensure high-quality, validated posts with seamless publication tracking.

AI Image & Video Generation Automation

- Built an AI-powered automation workflow with n8n to detect user intent and generate images, videos, or instant query responses.
- Integrated json2video, and captioning to create engaging content across Slack, WhatsApp, and web apps.
- Delivered seamless, real-time AI-driven interactions with minimal manual effort.

Education

BSC (CA&IT)

K.S School Of Business Management & IT

GPA: 3.88/5

2022 – 2025

Ahmedabad, India
